

XM Radio should have the right to provide their customers with local weather and traffic reports. I pay for and enjoy the up to the minute information that XM's Traffic & Weather service provide me. The National Association of Broadcasters has no right to stop XM Radio from providing services that enrich the lives of their existing customers while simultaneously attracting new ones. This is how smart businesses grow; expand their subscriber base and promote innovation through competition. You know, The American Way?. I ask the FCC to reject NAB's petition 04-160. This is nothing more than an attempt by an organization with a large group of lobbyists to manipulate the marketplace and deny us our freedom of choice!

Thank you for your time
